NOTE

In this report, "\$" refers to United State dollars (USD) and UZS refers to Uzbekistan sum.

CURRENCY EQUIVALENTS (as on the day of June 30th, 2019)

Currency Unit - sum (UZS) UZS 1,000.00 = \$0.1199
\$1.00 = UZS 8562.34

This social safeguard monitoring report is a document of the borrower. The views expressed herein do not necessarily represent those of ADB's Board of Directors, Management, or staff, and may be preliminary in nature.

In preparing any country program or strategy, financing any project, or by making any designation of or reference to a particular territory or geographic area in this document, the Asian Development Bank does not intend to make any judgments as to the legal or other status of any territory or area.

As per ADB Safeguard Policy Statement (2009) and the Operations Manual section on safeguard policy (OM F1), borrowers/clients are required to establish and maintain procedures to monitor the status of implementation of social safeguards management and ensure progress is made towards the desired outcomes.

Glossary

Compensation	Payment in cash or kind for an asset to be acquired or affected by a project at replacement cost.
Affected Persons	Affected persons (APs) are those who experience full or partial, permanent or temporary physical displacement (relocation, loss of residential land, or loss of shelter) and economic displacement (loss of land, assets, access to assets, income sources, or means of livelihoods) resulting from (i) involuntary acquisition of land, or (ii) involuntary restrictions on land use or on access to legally designated parks and protected areas. APs could be of three types: (i) persons with formal legal rights to land lost in its entirety or in part; (ii) persons who lost the land they occupy in its entirety or in part who have no formal legal rights to such land, but who have claims to such lands that are recognized or recognizable under national laws; and (iii) persons who lost the land they occupy in its entirety or in part who have neither formal legal rights nor recognized or recognizable claims to such land.
Entitlement	The range of measures comprising cash or kind compensation, relocation cost, income rehabilitation assistance, transfer assistance, income substitution, and relocation which are due to /business restoration which are due to AH, depending on the type and degree nature of their losses, to restore their social and economic base. All entitlements will be given to all affected households as per the entitlement matrix.
Khokimiyat	Local government authority that interfaces between local communities and the government at the regional and national level. It has ultimate administrative and legal authority over local populations residing within its jurisdiction.
Land acquisition	The process whereby a person is compelled by a public agency to alienate all or part of the land s/he owns or possesses, to the ownership and possession of that agency, for public purposes, in return for fair compensation.
Mahalla	Is a local level community-based organization recognized official by the GoU that serves as the interface between state and community and is responsible for facilitating a range of social support facilities and ensuring the internal social and cultural cohesiveness of its members. Mahalla leaders are elected by their local communities.
Meaningful Consultation	A process that (i) begins early in the project preparation stage and is carried out on an ongoing basis throughout the project cycle; (ii) provides timely disclosure of relevant and adequate information that is understandable and readily accessible to affected people; (iii) is undertaken in an atmosphere free of intimidation or coercion; (iv) is gender inclusive and responsive, and tailored to the needs of disadvantaged and vulnerable groups; and (v) enables the incorporation of all relevant views of affected people and other stakeholders into decision making, such as project design, mitigation measures, the sharing of development benefits and opportunities, and implementation issues.
Illegal	HHs that are not registered their business, agriculture, residential and orchard and those who have no recognizable rights or claims to the land that they are occupying and includes people using private or state land without permission, permit or grant i.e. those people without legal lease to land and/or structures occupied or used by

	<p>them. ADB's policy explicitly states that such people are entitled to compensation for their non-land assets.</p>
Replacement cost	<p>Replacement cost is the principle to be complied with in compensating for lost assets. Calculation of which should include: (i) fair market value; (ii) transaction costs; (iii) interest accrued, (iv) transitional and restoration costs; and (v) other applicable payments, if any. Where market conditions are absent or in a formative stage, APs and host populations will be consulted to obtain adequate information about recent land transactions, land value by types, land titles, land use, cropping patterns and crop production, availability of land in the project area and region, and other related information. Baseline data on housing, house types, and construction materials will also be collected. Qualified and experienced experts will undertake the valuation of acquired assets. In applying this method of valuation, depreciation of structures and assets should not be taken into account.</p>
Significant impact	<p>200 people or more will experience major impacts, which are defined as; (i) being physically displaced from housing, or (ii) losing 10% or more of their productive assets (income generating).</p>
Vulnerable Households	<p>Low-income households, female-headed households with fewer than 2 adult income- earners, the elderly headed with unemployed family members, and disabled.</p>
Leaseholder	<p>Legal entity (registered farm) running agricultural production with the use of land plots granted to him on a long-term lease. Lease term is limited up to fifty years but not less than for ten years. Leaseholder cannot sell - buy, mortgage, sublease present, exchange the land.</p>

Executive Summary

- i. The Government of Uzbekistan (GoU) has applied for a loan from the Asian Development Bank (ADB) for the development and improvement of Solid Waste Management (SWM) system of the capital city (Tashkent). The loan reference number is L3067-UZB: Solid Waste Management Improvement Project (SWMIP). The loan was signed between the Republic of Uzbekistan and Asian Development Bank (ADB) dated 27 February 2014 and Project Agreement dated 12 March 2014 signed between ADB, Tashkent City Municipality and the State Unitary Enterprise "MAXSUSTRANS".
- ii. The project was prepared to impact an improved urban environment and quality of life for the residents of Tashkent. The project will develop a sanitary landfill that meets international standards, rehabilitate transfer stations, and modernize the waste collection and transfer fleet. It will build capacity in waste management and help formulate a national strategy on solid waste management. At this stage of project implementation the detailed design is carried out. No civil works started under the project.
- iii. **Social safeguard monitoring** is carried out to assess the current issues on land, and to report any other social concerns occurred during project implementation. Social safeguard monitoring is carried out in compliance with the ADB requirements. This report is the Bi-annual Report on Social Safeguards Monitoring and Evaluation of the Solid Waste Management Improvement Project. It covers the period of January – June 2019. It presents the Due Diligence on social safeguards prepared in case of absence of project impacts (involuntary land acquisition and resettlement, losses of income and needs of income restoration and compensation as per the requirements of the ADB. The report presents a review of the actions taken by various stakeholders in the project for compliance with the ADB social safeguard requirements and further states the actions that would be taken in the due course of the project.
- iv. **Land acquisition and resettlement:** Land acquisition and resettlement plan was designed in 2012 at the stage of preparation of Feasibility study under the project. The project category was specified as Category B. The project detailed design is in progress. In compliance with the ADB requirements the LARP must be updated at the stage of detailed project design. Regular Social safeguard monitoring showed that there is no need to prepare the updated LARP. Project does not involve the involuntary land acquisition and resettlement impacts. In compliance with the ADB requirements in case of absence of land and resettlement impacts, a Due Diligence Report (DDR) is required. Due to this the Due Diligence report for social safeguards is prepared and presented the information on current LARP issues related to the construction of new landfill in this report. As the result, the project Category is C (no project impacts, no involuntary land acquisition and resettlement).
- v. **Gender:** Gender action plan is prepared and submitted to ADB through Bi-annual report.
- vi. **Redress grievances:** Grievance redress mechanism is designed for the project in LARP 2012. The complaint handling process is reported to ADB through quarterly and bi-annual reports. The PIU safeguard consultant periodically reviews and records the efficiency and effectiveness of the GRM highlighting the project's ability to prevent and address grievances. No complaints are received during this monitoring period (January – June 2019).
- vii. **Public Awareness and Consultations:** Public consultations will be conducted with people living along the project corridor before the construction stage to inform them on planned construction works and existing GRM.

1. Introduction

1. This report is the Bi-annual Report on Social Safeguard Monitoring includes the Due Diligence report on Social safeguards under Solid Waste Management Improvement Project. In agreement with the project officers of ADB Mission in Uzbekistan, based on the results of the Social Safeguard Monitoring, it was decided to prepare a Due Diligence report, which will reflect the current changes in the project's impact. The report covers current status of the social safeguard indicators of project.
2. To conduct the safeguard monitoring under the project, PIU Consultants (H.P. Gauff Ingenieure GmbH & Co. KG – JBG- (Germany) and GWK Consult GmbH (Germany) and ENG-INVEST Consulting Ltd (Uzbekistan) were selected through the tender, and the agreement was concluded with them in December of 2016.
3. International Construction Contractor has not been hired yet. The project is on stage of detailed design started in December 2018. The contractor for detailed design of new landfill and closure the existing landfill is Sanitary Landfill Design and Supervision Consultant – China Urban Construction Design & Research Institute Co., Ltd." The period of preparation of detailed design is December 2018- May 2019. The construction period will be 18 months.
4. Environmental Management & Social Safeguard monitoring is implemented during the whole period of project detailed design and civil works.
5. The social safeguard monitoring provides information on: i) progress of the land acquisition and resettlement by establishing social safeguard compliance status, ii) status of implementation of social safeguard measures for all persons affected by the project taking into account the available and potential social risks resulting from implementation of the project, iii) identification of non-conformances / unanticipated impacts and implement necessary mitigation / remedial measures (in case of adverse impacts), and iv) monitoring and evaluation of implementation of other safeguard measures.
6. The social safeguard monitoring is carried out on quarterly basis. The main objective of this Bi-annual Social safeguard monitoring report is to provide progress on issue on land acquisition, and to report any other social concerns occurred during project implementation. The report is also prepared to comply with social safeguard requirements of the Government of Uzbekistan and ADB as well as to fulfill the loan covenant as described in the loan agreement No.: 3067-UZB signed between Government and ADB.
7. The ADB safeguard policy requires that project implementation will subject to the LARP related conditions. The most important conditions are: (i) land acquisition including demolishing of any structure and housing is allowed only after all compensations are fully paid, and (ii) commencement of Civil Works is conditional to the satisfactory implementation of the final LARP to be checked and verified by independent monitoring party and reported in the LARP compliance report.
8. At this stage of project implementation the detailed design is in progress. No civil works are started. In compliance with the ADB requirements the LARP must be updated once detailed design under the project is completed. During the previous monitoring stages it was found out that the lands required for project implementation was owned by the local authorities. In August 2018 the required land plot for new landfill was allocated to SUE "Maxsustrans" for construction. Due to this Consultant prepared the Due Diligence for social safeguards.

2. Project description and current activities

2.1 Project Description

9. The Government of Uzbekistan (GOU) seriously recognizes the need to develop and implement a national Solid Waste Management (SWM) strategy. Solid Waste Management Improvement Project (L3067-UZB) is implemented for the development and improvement of Solid Waste Management (SWM) system of the capital city (Tashkent). Therefore, the GOU has requested support from ADB to address the SWM challenges. The proposed Project will contribute to sustainable urban development in Uzbekistan by:

- (i) modernizing SWM to provide continuous and reliable municipal services;
- (ii) promoting financial sustainability of municipal services through tariff rationalization and prudent financial management;
- (iii) supporting policy and institutional reforms for improved sanitation and environmental management;
- (iv) mitigating climate change through a major reduction of GHG emissions, and through compliance with international standards on waste minimization and material recycling; and through all these measures;
- (v) improving livability of cities.

10. The volume of the existing dumpsite is exhausted and the original plan of the city was to extend its dumpsite operations to an adjacent lot of additional 30 hectares of area. Being fully aware of the inevitable environmental impacts through the extension of this practice, the city asked the national government for assistance in this matter. Based on these activities, the Cabinet of Ministers approved in summer 2012 the location of new dumpsite on 30 hectares of agricultural area for the utilization for waste management activities.

11. According to the designed Feasibility study of the project, 30-hectare land plot located immediately to the south of the existing Akhangaran dumpsite (25 ha for Landfill and 5 ha for facilities) was considered as land plot for new potential landfill. This land plot was planned to allocate for development an interim dumpsite extension and also for upgrading this facility to a sanitary landfill facility in compliance to internationally accepted standards of environmental protection.

12. Project entails potential land acquisition of 30 ha. The appropriate Land acquisition and resettlement plan for potential allocation of land plot was prepared in 2012. LARP included all the potential impacts, mitigation measures and requirements for the project implementation. In compliance with ADB SPS requirements LARP will be updated once the detailed design is ready (May 2019).

2.2 Project Objectives and Outputs

13. The overall objective is to provide an improved solid waste management (SWM) system in Tashkent, the capital city, to upgrade urban infrastructure and services. The project will develop a sanitary landfill that meets international standards, rehabilitate transfer stations, and modernize the waste collection and transfer fleet. It will build capacity in waste management and help formulate a national strategy on solid waste management.

14. Given the current SWM practices, the option converting and allocating an area adjacent to the existing dumpsite to an engineered Sanitary Landfill was decided. The proposed sanitary landfill facility (SLF) concept will be based on the Best Environmental Practices (BEP) resulting to a state-of-the-art design consistent with international acceptable standards. This "stand alone" facility will drastically improve the SWM system (i.e. the handling and final disposal of MSW) with a possible integration capability for a long-solution to cover the entire Tashkent region. The inclusion into the design of a multi-barrier system, leachate and gas collection systems will result in a significant reduction of anticipated impacts. Solid Waste Management Improvement Project (hereinafter called "Project") is to contribute to the following issues:

- Segregation of Municipal Solid Waste stream;
- Proper collection and dumping to appropriate sites
- Establishment of modern SWM systems
- Remediation of old 'truck and dump' practices in cities and regions

15. The project was prepared to impact an improved urban environment and quality of life for the residents of Tashkent. The outcome will be improved SWM services and management in Tashkent with the following key outputs: (i) Output 1 - Rehabilitated and expanded solid waste management (SWM) system in Tashkent; (ii) Output 2 - Strengthened operational capacity; (iii) Output 3 - National SWM strategy.

16. There are two executing agencies (EAs) for the project – the Tashkent Municipality (Hokimiyat of Tashkent city) for the overall oversight and monitoring of Outputs 1 and 2 and State Committee of the Republic of Uzbekistan of Ecology and Environment Protection (SCEEP)¹ for execution of Output 3—the national SWM strategy. Outputs 1 and 2 will be implemented by State Unitary Enterprise "MAXSUSTRANS". A PIU was established within MAXSUSTRANS to support project implementation. This support will include project management, financial management, procurement, contract administration, safeguards implementation, construction and technical supervision, and monitoring and evaluation.

17. GoU through its Implementing Agency (IA), the State Unitary Enterprise (SUE) "MAXSUSTRANS" utilizes part of project loan proceeds towards the cost of the contract for Consulting Services related to Project Management, Implementation and Supervision, supporting the Project Implementation Unit (PIU).

2.3 Project Site Description

18. The Akhangaran landfill is located approximately 35 km south of the center of Tashkent City in the Akhangaran district of Tashkent Province. The facility has been in use since 1967 and is currently handling the wastes collected from Tashkent city and partial from Chirchik. The proposed site for a modern Sanitary Landfill is located at the eastern side of the existing Akhangaran Landfill.

¹ According to the President Decree # 5024 as of 21.04.2017 the State Committee of Uzbekistan for Nature Protection was renamed into the State Committee of the Republic of Uzbekistan of Ecology and Environment Protection (SCEEP)

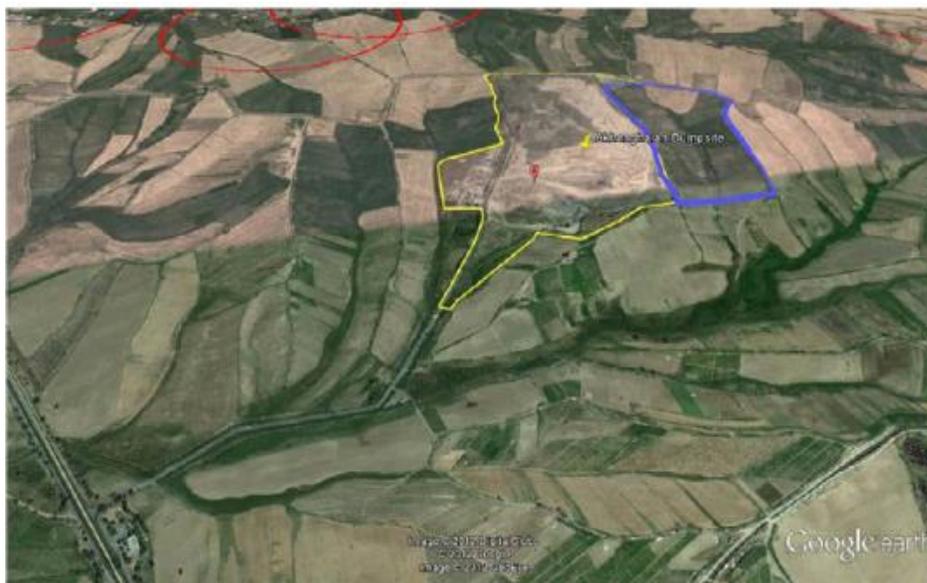

The total area for Landfill will cover approximately 25 hectares of agricultural land. Location map of Akhangaran landfill is given on **Figure** below.

Figure 1 Location map of Akhangaran landfill

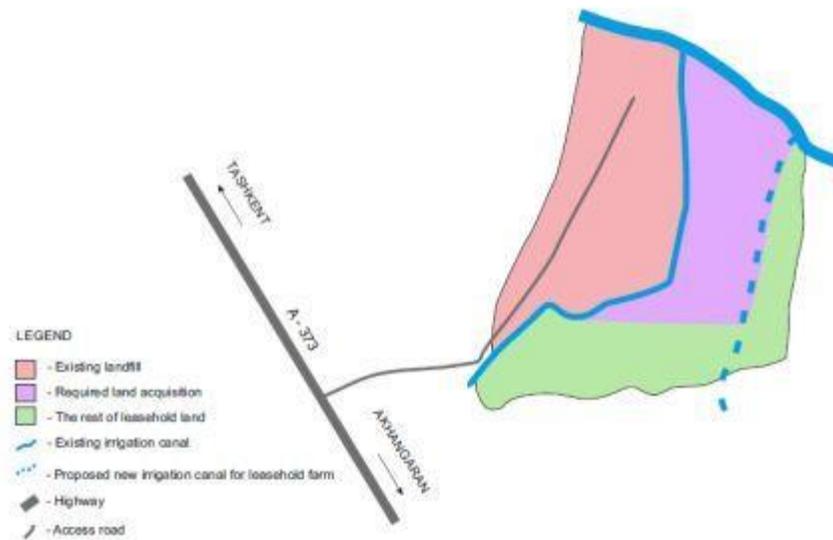

19. Access to the site: Land acquisition for the expansion of existing landfill will not require construction of any additional access road to the site. This is visualized below on given image (**Figure** below). Access to land will be through already functioning road. Existing access and other bypass roads should be taken in consideration for repair- and reconstructions works. Buffer zone for the SLF will be within the acquired land plots.

Figure 2 Proposed Akhangaran landfill expansion

* Yellow line is border of existing landfill; blue line is border of expansion

Figure 3 Map of acquired land plot and irrigation canal

2.4 Project management and Contractors team

20. **Agencies involved in Investment Program Implementation:** The following agencies are involved in implementing the investment program:

- State Committee on Ecology and Environmental Protection (SCEEP²) and Tashkent Hokimiyat (Municipality) are the Executing Agencies (EA). Tashkent Hokimiyat responsible for management, coordination and execution of all activities funded under the loan and has overall responsibility for compliance with loan covenants. SCNP is responsible for implementation of output 3 of the project – preparation of National Municipal Solid Waste Strategy of city Tashkent.
- State Unitary Enterprise “Maxsustrans” (Maxsustrans) is the implementing agency (IA), which is responsible for administration, implementation (design, construction and operation) and all day-to-day activities under the loan. An Investment Program Implementation Unit (PIU) is established within Maxsustrans for Investment Program related functions. The PIU coordinates construction of subprojects, and ensures consistency of approach and performance.

21. **Project team:** Maxsustrans hired International Project Management and Supervision Consultant (PIU Consultants) - *H.P. Gauff Ingenieure*. The Company has a many-year-long work experience in the field of waste management. Under the Tender terms and conditions, the mentioned Company hired a national Social Safeguard Specialist (Ms. Maria Malinovskaya) and national

² According to the President Decree # 5024 as of 21.04.2017 the State Committee of Uzbekistan for Nature Protection was renamed into the State Committee of the Republic of Uzbekistan of Ecology and Environment Protection (SCEEP)

Environmental expert (Mr. Sergey Karandayev), who are implementing social and environmental safeguards services.

22. The selection of a consultant began in December 2017. The contract was awarded on November 16, 2018. The main reasons for the delay are the following: 1) Changes in the legislation of the Republic of Uzbekistan on procurement procedures, including for IFC funds. 2) Process of institutional reforms among the government bodies and executive agencies initiated by the government in 2017; 3) Composition of Tender Commission of Tashkent Khokimiyat responsible for holding a large-scale tenders changes 3 times due to the amendments in order and regulations of tender commissions. This all delayed the process of evaluation, approval of the results of the evaluation and award of the contract.

23. Construction Supervision Company is responsible for preparing quarterly progress reports which cover the implementation of the Social safeguard measures that may occur during the implementation. All mitigation measures during construction will be implemented by the contractor and these will be monitored by the Supervision Consultant (SC).

24. Sanitary Landfill Design and Supervision Consultant "China Urban Construction Design & Research Institute Co., Ltd." has been hired on December 14, 2018. This consulting company carries out design works of closing old landfill and establishing of new sanitary landfill. During the construction work they will supervise all construction works related to Landfill establishment.

3 Social Safeguard activities

3.1 Objectives of Due Diligence Report and Methodology

25. The objective of the Due Diligence Report (DDR) is to confirm that the project does not trigger ADB's Safeguard Policy Statement (2009)'s Safeguard Requirements regarding involuntary resettlement and project affected people.

26. Specifically, the DDR will (i) specify whether the development of project is free of any involuntary resettlement impacts, e.g., land acquisition, displacement, and (ii) ascertain if there would be any adverse impacts on income and livelihood on any of people specified in LARP 2012.

27. The DDR also details the consultation process to be conducted with people living along the project corridor before the construction stage to inform them on planned construction works and existing Grievance Redress Process. The field visits were undertaken by the Project Design team's Social Specialist and Environmental specialist in May 2019.

3.2 Scope of Due Diligence Report (DDR)

28. This DDR relates to the Akhangaran landfill. The DDR has been prepared by Social safeguard consultant as Bi-annual social safeguard monitoring to substantiate that the land required for the new landfill construction has been allocated from local reserve land fund and no project affected people as well as compensation are required under the project. After the final design is approved the construction works will be start.

3.3 Rationale for Due Diligence Report (DDR)

29. The ADB Safeguards Policy Statement (SPS) 2009 and the provisions of ADB approved Land Acquisition and Resettlement Plan (LARP) was published on the ADB website in 2012. The LARP was required as the project expected involuntary resettlement, land acquisition and loss of incomes. The project category was specified as Category B.

30. The project detailed design is in progress. In compliance with the ADB requirements the LARP must be updated at the stage of detailed project design. However regular Social safeguard monitoring showed that there is no need to prepare the updated Land Acquisition and Resettlement Plan (LARP) as currently project does not involve the involuntary land acquisition and resettlement impacts. In compliance with the ADB requirements in case of absence of land and resettlement impacts, a Due Diligence Report (DDR) is required. Due to this Consultant prepared the Due Diligence report for social safeguards and presented the information on current LARP issues related to the construction of new landfill.

Table 1 Checklist of LARP impacts

LARP 2012	Due diligence June 2019
CHANGING ON PROJECT DESIGN	
<p>The project is located approximately 35 km south of the center of Tashkent City in the Akhangaran district of Tashkent Province. The facility has been in use since 1967 and is currently handling the wastes collected from Tashkent city and partial from Chirchik. The proposed site for a modern Sanitary Landfill is located at the eastern side of the existing Akhangaran Landfill.</p>	<p>No changes.</p>
CHANGING ON IMPACTS ASSOCIATED WITH LAND ACQUISITION AND RESETTLEMENT	
<p>The Project construction would entail involuntary land acquisition and involuntary resettlement impacts on agricultural land.</p>	<p>The Project constructions WILL NOT entail involuntary land acquisition and involuntary resettlement impacts on agricultural land.</p> <p>The land plot required for project is allocated for the project from local reserve land fund. The project will not have negative impact on people.</p>
<p>The Project construction would entail land acquisition on 49.9 ha of agricultural land, 44.7 ha of them are irrigating lands.</p>	<p>The Project construction requires 30 ha of agricultural land allocated for project implementation from local reserve land fund.</p>
<p>The census identified 1 NGO and 1 farm which belong to 1 affected household (AH) and 9 agricultural workers which will be adversely affected as a result of the Project.</p>	<p>There are NO PROJECT AFFECTED PEOPLE impacted by the project.</p>
<p>There will be no any other impact associated with land acquisition for the sanitary landfill. However, after the operation of this new Akhangaran landfill the existing dumpsite will be closed. Due diligence revealed on that existing dumpsite ongoing activity of informal waste pickers (IWPs). Due to fact that this activity is illegal surveyors were unable to confirm exact number of IWPs. With assistance of local community leaders surveyors were able to estimate about 80-100 IWPs on that existing dumpsite. It is recommended that Mahsustrans to develop action program to address this impact from closure of the existing facility.</p>	<p>There will be no any other impact associated with land acquisition for the sanitary landfill. The existing dumpsite will be closed after the operation of new Akhangaran landfill is started.</p> <p>Current Due diligence revealed on that existing dumpsite activity of officially employed waste pickers (7 permanent WPs and 30-35 waste pickers with hourly rate wage³). These waste pickers are employed by the State rehabilitation center / Mehr Sahovat Ltd. The rehabilitation center provides these people with the work and guarantees for salary. After the existing landfill is closed these people will be re-employed at the other infrastructural facilities like transfer stations, sorting stations, land and road improvement enterprises etc.</p>

³ Official letter on total number and working conditions of waste pickers provided by State rehabilitation center / Mehr Sahovat Ltd

GRIEVANCE REDRESS MECHANISM	
<p>Complaints can be submitted to mahalla, village assembly of citizens, farmer councils or directly to EA and IA. Although usually, the district hokimiyat will be the entry point for receiving complaint or known as a Grievance Focal Point (GFP)⁴. Upon receipt of a complaint, the GFP will establish contact with IA and its PMU and mahalla and other relevant bodies. The Program Management Unit (PMU) will establish a complaint handling team headed by one of the IA management staff designated for handling grievances of the project. All complaints will be resolved in 15-20 days, and in case additional details are required, a maximum of 30 days will be used to resolve and close the complaint. The Project Grievance Redress Mechanism does not prevent any AH to approach the national/government legal system to resolve their complaints at any stage of the grievance redress process. The APs can address their complaints to the courts at any time and not only after using the GRM</p>	<p>The existing GRM functions for the whole period of project implementation. For the period of Social safeguard monitoring (2018-2019) no complaints or addresses on project are registered.</p> <p>Monitoring of complaints and addresses is carried out by the Social safeguard consultant within the quarterly periods of monitoring.</p>
INCOME RESTORATION AND REHABILITATION	
<p>In this project the identified AH will lose more than 30% of its cropped land, which is defined as main income generating asset of the farmer. During consultations AH expressed a strong request to consider and ensure land for land compensation of same value and productivity instead of common applied support measures such as trainings and offering employment. In that way AH will be able to relocate farming and continue his activities without impact on his HH livelihood. In addition to compensation as per entitlement matrix, the project will provide severely affect allowance for income restoration.</p>	<p>There are no project affected people under the project. The land plot required for project is allocated from the local reserve land funds in August 2018.</p> <p>There is no need to restore the income of waste pickers. They are employed by the state rehabilitation center / Mehr Sahovat Ltd and will be re-employed to other public / infrastructural facilities.</p>
<p>PMU will be responsible for planning and implementing income restoration and livelihood improvement measures. For that purpose, PMU will closely work with Farmers Council, Khokimiyats, Land Resources and Cadastre Department and local labor agencies for effective implementation of income restoration strategy. A detailed action plan will be prepared and submitted to ADB before start of civil works at affected land plots.</p>	<p>The project detailed design is in progress. In compliance with the ADB requirements the LARP must be updated at the stage of detailed project design. However regular Social safeguard monitoring showed that there is no need to prepare the updated Land Acquisition and Resettlement Plan (LARP) as currently project does not involve the involuntary land acquisition and resettlement impacts. In compliance with the ADB requirements in case of absence of land and resettlement impacts, a Due Diligence Report (DDR) is required. Due to this Due Diligence report for social safeguards is prepared in June 2019.</p>

⁴ Under the Government Grievance mechanism, the District Hokim is designated as the Grievance Focal Point.

PROJECT CATEGORY

Project Category B (involuntary land acquisition and resettlement, losses of incomes)

Project Category C (no project impacts / no involuntary land acquisition and resettlement, no losses of incomes)

4 Compliance to safeguards provisions in agreements under the project

4.1.1 Compliance to Project Administration Manual

31. The Project Administration Manual (PAM) describes the essential administrative and management requirements to implement the project on time, within budget, and in accordance with Government and Asian Development Bank (ADB) policies and procedures. The PAM is mandatory and serves as the main document describing implementation details. The status of implementing the safeguards requirements set out in PAM are provided in Table below.

Table 2 Compliance to PAM

Details	Compliance Status	Remarks
Section VII - Safeguards b) Social – Involuntary resettlement.	Completed	Monitoring of social safeguards is implemented quarterly (Quarterly Reports -Bi-annual reports).
Municipality and Maxsutrans ensure that LARP would be implemented, and monitored to ensure that no affected people would suffer by unattended impacts associated with land acquisition.	On-going	IA ensures that no affected people would suffer by unattended impacts associated with land acquisition. LARP 2012 was prepared in compliance with the designed Feasibility study of the project.
Municipality and Maxsutrans ensure that: (i) The PIU recruit a social development specialist to implement the LARP and address other social concerns of the project, if any.	Completed	In 2017 PIU recruited a social development specialist to monitor the LARP and other social concerns of the project. Consultant carries out monitoring of LARP and submits the results of monitoring in Quarterly reports /Bi-annual reports.
(ii) The LARP would be updated upon completion. The report should at least indicate any change to land acquisition from the detailed designed, change to affected people, or change to budget for LARP implementation. The updated LARP must be submitted to ADB for concurrence prior to implementation.	Still ongoing according to necessity	No civil works are started under the project. Development of detailed design is started in December 2018 and is at stage of completing. In compliance with the ADB requirements LARP must be updated once the detailed design is completed. In case of absence of land and resettlement impacts, a Due Diligence Report (DDR) is required. Resulted by the social safeguard monitoring results, currently project does not involve the involuntary land acquisition and resettlement impacts. Due to this Consultant prepared the Due Diligence report

		for social safeguards and presented the information on current LARP issues related to the construction of new landfill.
(iv) The LARP would be disclosed to affected people.	Completed	<p>LARP 2012 was disclosed on ADB and Maxsustrans websites. The link to JMRC site is https://www.adb.org/projects/45366-004/main.</p> <p>The Due Diligence report (Bi-annual June 2019) is prepared and will be disclosed at ADB and Maxsustrans websites after approval of ADB. The next monitoring report will include the link on the disclosed report.</p>
(vi) The awarding of civil works any contract would be done only after affected people (including other parties to receive compensation for developing new agricultural land) receive full payment of compensation, and report on full payment of compensation is submitted to ADB. The advance payment to the contractor only can be released by ADB after the report on full payment is received.	On-going.	<p>IA ensures that LARP is completed prior the commencement of construction and procurement tenders.</p> <p>Civil works will be commenced only the detailed design is approved by ADB.</p> <p>Due diligence results showed that no compensation for project impacts is required. The land required for project is allocated from local reserve land plot. No project affected people.</p>
(vii) Report on monitoring the implementation of LARP will be submitted to ADB on a quarterly basis until the payment of compensation to affected parties are fully paid.	On-going	<p>Consultant carries out quarterly monitoring of LARP.</p> <p>Due to the absence of project impacts, Due Diligence report on social safeguards is prepared.</p>
(viii) The Social development specialist of PIU will develop the implementation plan in close consultation with local government for livelihood improvement program to address impacts to waste pickers and waste collection points due to closure of existing dumpsite.	On-going	<p>Consultant monitors the impacts on waste pickers and waste collection points.</p> <p>Informal waste pickers: No informal / unofficial waste pickers works at the existing landfill. There were 7 permanent contracted waste pickers and 30-35 with hourly rate wage who are engaged in collection and sorting the wastes. Main source of income of them is salary of work at the landfill. Closure the existing</p>

		<p>landfill will not affect these waste pickers. They will not lose the income / livelihoods. They will be re-employed to other public / infrastructural facilities by the employing company.⁵</p> <p>No mitigation measures / actions for waste pickers are required.</p> <p>Waste collection points (waste paper, plastic, polyethylene and other): At this stage of project implementation there are no impacts on waste collection points.</p>
<p>Section VII - Safeguards c) Social – Indigenous people In the proposed project area and affected area, no group of people maintain a separate cultural and social identity from the mainstream Uzbekistan society that would classify them as ethnic group, ethnic minority or indigenous people as described in ADB SPS, 2009. Therefore, the proposed project has been categorized as a "C" project in relation to indigenous peoples.</p>	<p>Not applicable.</p>	<p>N/A</p>
<p>Section IX - Performance Monitoring, Evaluation, Reporting and Communication B. Monitoring. Safeguards monitoring – Resettlement: Land acquisition completion report would be submitted to ADB before award of civil works contracts which involves land acquisition and resettlement concerns. Monitor the progress on implementation and performance in regards to the safeguards requirements would be carried out before the civil works start.</p>	<p>On-going.</p>	<p>Consultant carries out monitoring of mitigation measures given in LARP 2012 of the project.</p> <p>LARP will be updated once the detailed design is completed (May 2019).</p> <p>All safeguard requirements will be completed before the civil works start.</p>

⁵ State rehabilitation center / "Mehr sahovat" Ltd. Company

<p>Section IX - Performance Monitoring, Evaluation, Reporting and Communication B. Monitoring. Disclosure of Monitoring Reports</p> <p>All the reports prepared within the project must be disclosed at ADB' website and website of PIU or Maxsustrans.</p>	<p>Being complied.</p>	<p>Quarterly social safeguard monitoring reports will disclosed on ADB and PIU or Maxsustrans websites.</p> <p>The link to JMRC site will be given in the reports and public materials.</p>

4.1.2 Compliance with Social Safeguard Covenants of Loan Agreement

32. The status of Compliance with social Safeguard Covenants of Loan Agreement is presented in below:

Table 3 Compliance to social safeguard covenants

Indicators	Status	Remarks
<p>Resettlement: The Borrower shall ensure that all land and all rights-of-way required for the project are made available to the Works contractor in accordance with schedule agreed under the related Work contract and all land acquisition and resettlement activities are implemented in compliance with (a) all applicable laws and regulation of the Borrower relating to land acquisition and involuntary resettlement, (b) the involuntary Resettlement Safeguards; and (c) all measures and requirements set forth in the LARP, and corrective of preventative action set forth in the Social Safeguards Monitoring Reports. Without limiting the application of the Involuntary Resettlement Safeguards or the LARP, the Borrower shall ensure that no physical or economic displacement takes in connection with the Project until; compensation and other entitlements have been provided to affected people in accordance with LARP; and a</p>	<p>On-going</p>	<p>IA ensures that all land and all rights of rights-of-way required for the project are made available.</p> <p>The project has complied with the ADB Safeguard Policy Statement 2009, Land Code of the Republic of Uzbekistan, Resolution of Cabinet of Ministers of RUz # 97 (29 May 2006), Resolution of Cabinet of Ministers of RUz # 146 (25 May 2011) and other relevant laws and guidelines of the Republic of Uzbekistan on the safeguard issues of land acquisition and involuntary resettlement.</p> <p>Civil works are no started yet. The project is on the stage of development of detailed design for the construction site.</p> <p>In 2012 LARP was prepared based on the Feasibility study designed under the project. Due to the absence of project impacts Consultant prepared Due Diligence report for Social safeguards.</p>

<p>comprehensive income and livelihood restoration program has been established in accordance with LARP.</p>		<p>During last semiannual monitoring period (Bi-annual report 2018) Consultant received information on availability of the land plot (30 ha) required for the construction of new landfill. The 30 ha land is allocated for project from local reserve land funds (Akhangan district).</p>
<p>Indigenous Peoples: The Borrower shall ensure that the preparation, design, construction, implementation and operation of the Project and all project facilities comply with (a) all applicable laws and regulation of the Borrower relating to indigenous people; (b) the Indigenous people Safeguards; and (c) all measure and requirements set forth in the IPP (indigenous peoples plan), and any corrective or preventative actions set forth in as Safeguards monitoring Report.</p>	<p>Not applicable.</p>	<p>N/A.</p> <p><i>There are no groups of people maintain a separate cultural and social identity from the mainstream Uzbekistan society that would classify them as ethnic group, ethnic minority or indigenous people as described in ADB SPS, 2009.</i></p>
<p>Grievance Redress Mechanism: Within 12 months after the Effective Date, Borrower shall prepare a grievance redress mechanism acceptable to ADB and establish a special committee to receive and resolve complaints/grievance or act upon reports from stakeholders on misuse of funds and other irregularities, Including grievance due to resettlement. The special committee shall (i) make public of the existence of this grievance redress mechanism, (ii) review and address grievance of stakeholders of the Project, in relation to either Project, any of the service providers, or any person responsible for carrying out any aspect of the project; and (iii) proactively and constructively responding them.</p>	<p>Complied</p>	<p>Grievance redress mechanism was designed within the preparation of LARP in 2012.</p> <p>IA ensures monitoring of complaints and addresses received under the project.</p> <p>During the monitoring period of January – June 2019 there are no registered complaints and addresses.</p>

<p>Safeguards Monitoring and Reporting: The Borrower shall do the following: (a) submit quarterly Safeguards monitoring reports to ADB and disclose relevant information from such reports to affected person promptly upon submission; (b) if any unanticipated social risks and impacts arise during construction, implementation or operation of the Project that were not considered in the LARP, promptly inform ADB or the occurrence of such risks or impacts, with detailed description of the event and the proposed corrective action plan; (c) report any actual or potential breach of compliance with the measures and requirements set forth in the LARP promptly after becoming aware of the breach.</p>	<p>On-going</p>	<p>Social safeguard monitoring reports will be prepared on quarterly basis.</p> <p>Any actual or potential breach of compliance with the social safeguard measures and requirements will be reported to PIU and ADB.</p> <p>Quarterly / semiannual reports on social safeguard monitoring will be submitted to ADB and disclosed.</p>
--	-----------------	---

5 Gender and poverty assessment

33. **Gender and poverty assessment:** Gender action plan is prepared and submitted to ADB through Bi-annual report.

34. The GAP is prepared on bi-annual period and presented in Annex 1 of this report. As per GAP the equal role of women in the collection and processing of waste is guaranteed by SUE "Maxsustrans". In 2019, at the transfer station and the landfill site, all employees in the number of 154 people including 22 women were insured (15% are women). Women work in administrative and support staff positions. Men work at engineering and technical staff positions. According to the schedule, annual medical examination of all employees, including women, is conducted at the site.

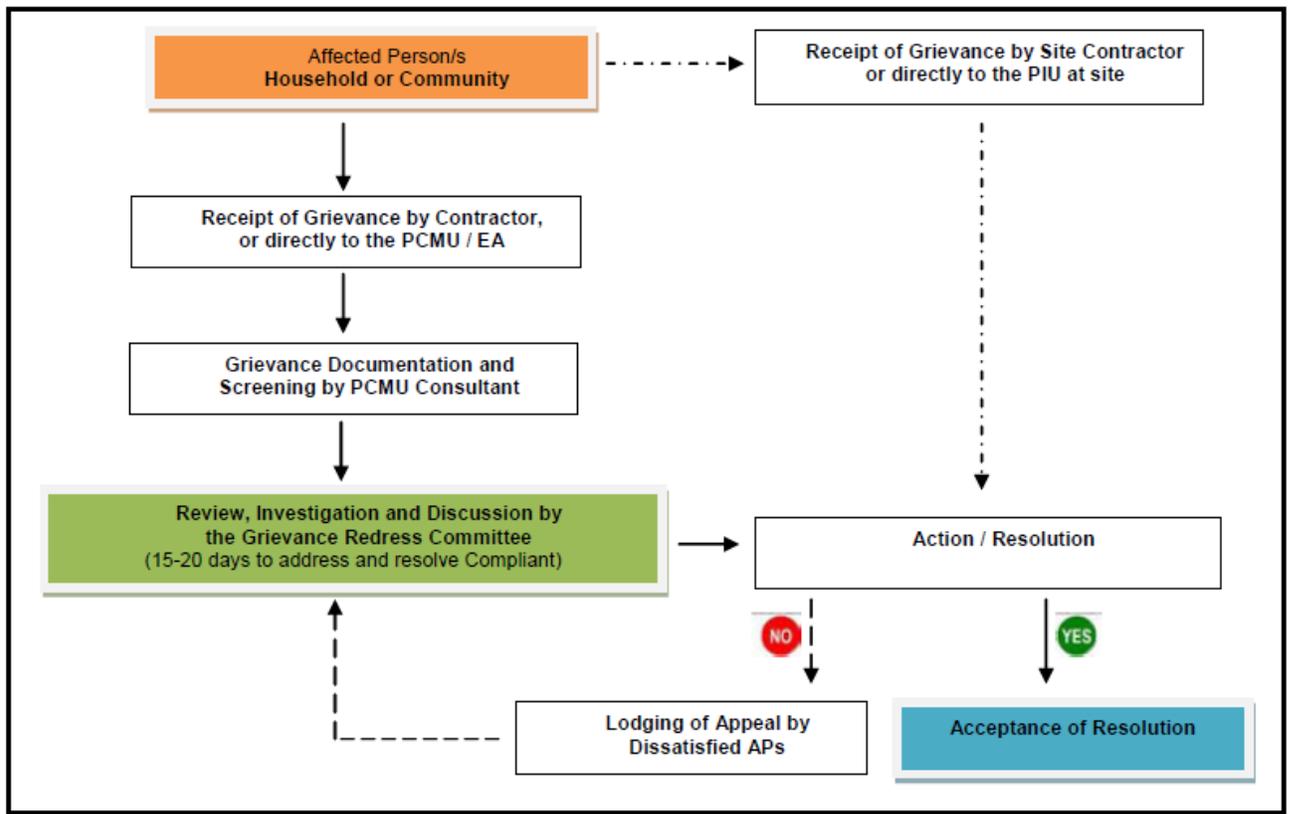

35. Improvement of working conditions for women is carried out due to the results of social evaluation of women's need. A social evaluation of the women's needs was conducted by SUE "Maxsustrans". As a result, it was found out that women have separate office rooms; the rooms are bright, clean with air conditioning; there is a sofa for rest in the office. There is a separate toilet. No requests for additional needs from women were obtained during the social evaluation. They are satisfied with the provided working conditions for them.

36. **Ethnicity Minorities and Indigenous People:** There is no minority in the project area. Therefore, as described in ADB's SPS, 2009 no special action is required for this indicator.

37. Redress Grievances

38. A project-specific grievance redress mechanism (GRM) is established by the EA to provide a transparent mechanism to voice and resolve environmental concerns linked to the project. According to the Decree of President of the Republic of Uzbekistan SUE Maxsustrans established (organized) "People's Reception Room" in its each district branch in Tashkent city, including one in SUE Maxsustrans building for PIU related queries. The EA ensures that grievances and complaints are addressed in a timely and satisfactory manner to avoid any potential delays in the establishment of the project. Figure below gives the details of the grievance redress mechanism.

Figure 4 Grievance Redress Mechanism*

* PIU – responsible person for GRM is the director of PIU, Mr. Rustam Shukurov, tel: +99871 2477923
EA is SUE Maxsustrans. The responsible person for GRM is Mr. Shukhrat Inogamov, tel: +99871 2473599, email: maxsustrans@inbox.ru
PCMU Consultant is social and resettlement specialist, Mrs. Maria Malinovskaya, tel: +99871 1508887, email: malinovskaya@almarconsulting.org

39. The PIU has established Grievance Redress Committee (GRC). GRC provides any APs a venue to file complaints and queries on any environmental (or social) aspect related to the project. Grievances can be submitted in writing or orally to the contractor or directly to the PIU / EA contact person. These are properly documented (i.e. indicating the date it was received,

details of the complaint and complainant/s) and screened by the designated PCMU safeguard consultant for its veracity and validity. The committee has 15 to 20 days to address and come up with a resolution. Under this GRM, unsatisfied grievances may be able to appeal for a final resolution. This mechanism also does not prevent any AP to approach regulatory agencies to assist and resolve complaints at any stage of the process. In occasions wherein grievances are perceived by the AP to be immediate and urgent; the contractor, EHS officer and PIU on-site supervisor will provide the most accessible and practical solution for a quick resolution of grievances. Such grievances and respective resolutions submitted to the PIU for proper documentation. The PIU contact person is responsible for recording the complaint, the step taken to address grievance, minute of the meetings and preparation of a report for each complaint. Records is kept by the PIU of all grievances received including contact details of AP, date the complaint was received, nature of grievance, agreed remedial / corrective action and the date this was implemented, and the final outcome in Complaints Log Book kept at the PIU office.

40. The complaint handling process will be reported to ADB through semi-annual reports. The PIU safeguard consultant will periodically review and record the efficiency and effectiveness of the GRM highlighting the project's ability to prevent and address grievances.
41. In period of January – June 2019 Consultant contacted with the representatives of regional and district khokimiyat of the project area to obtain information on complaints. No complaints / addresses are received during current report preparation. Consultant will continue monitoring of complains under the project at further stage of project implementation to ensure the proper and timely address any complains under the project.

6 Public Awareness and Consultations

42. Consultant conducts mean meaningful consultation with project stakeholders and persons involved into the project implementation.
43. The meaningful consultation will be conducted with people living along the project corridor before the construction stage to inform them on planned construction works and existing Grievance Redress Process.

7 Conclusion

44. Consultant carries out Bi-annual monitoring, including Due diligence for social safeguards. Due diligence report is prepared due to the absence of project impacts mentioned in LARP 2012. Results of due diligence showed that the current **Project Category is considered as Category C (no project impacts, no involuntary land acquisition and resettlement, no losses of income and needs for income restoration).**

45. Implementation of project is complied with the social safeguards requirements of loan agreements and PAM.

46. At this period no civil works are started yet. The project is at the stage of completing the detailed design for construction new landfill and closure of existing one.

47. Due Diligence report is prepared to confirm that the project does not trigger ADB's Safeguard Policy Statement (2009)'s Safeguard Requirements regarding involuntary resettlement and project affected people. All the social issues and required mitigation measures are completed before the start of civil works.

48. Table below presents the implementing schedule of the project:

Step	Action	Responsibility	Timing
A)	Detailed design of the project	EA / IA, PIU, Mahsustrans, Tashkent City Government, Construction Supervision Company	6 months December 2018 - June /July 2019
1	Topographic mapping and develop general layout	EA / IA, PIU, Mahsustrans, Construction Supervision Company	December 2018- February 2019
2	Detailed Engineering Design of Dumpsite Closure	EA / IA, PIU, Mahsustrans, Construction Supervision Company	February –April 2019
3	Final Design Documents	EA / IA, PIU, Mahsustrans, Construction Supervision Company	May 2019
B)	Civil Works	EA / IA, PIU, Mahsustrans, Construction Supervision Company	20 months June 2019-November 2020
C)	LARP		
1.	Updating LARP	PIU	Due Diligence report is prepared in Bi-annual social safeguard report – June 2019
2.	LARP Implementation	PIU	Not applicable / No project impacts

3.	Public consultation and information sharing on project activities	PIU	Before start of construction works
4.	Payment compensation to AHs / APs	Mahsustrans, Tashkent City Government	Not applicable / No project impacts
5.	External Review of LARP Implementation through submission of a compliance report (LARP verification)	External Resettlement Consultant	Not applicable / No project impacts
7.	Construction works	IA / PIU, Mahsustrans, Tashkent City Government	After detailed design is approved by ADB
D)	MONITORING		
1.	Internal monitoring: Reporting to ADB	PIU	Quarterly monitoring during the project
2.	External Monitoring: Reporting to ADB	External Resettlement Consultant	Quarterly monitoring during the project

49. Recommendation for next Social safeguard monitoring and evaluation report:

- (i) Assess the progress on registration of the rights for the land allocated for construction of new landfill;
- (ii) Monitoring and assessment of complaints received upon the project;
- (iii) Monitoring any social issues which may occur during the next stages of project implementation;
- (iv) Develop required actions and measures to mitigate any impacts if required;
- (v) Regular coordination with the EA / IA.

REPUBLIC OF UZBEKISTAN
KHOKIM
OF AKHANGARAN DISTRICT
OF TASHKENT REGION

DECISION

August «25», 2018 № 1536

Akhangaran town

On the allocation of land plot for improvement the solid waste management system for SUE "Maxsustrans" of khokimiyat of Tashkent city out of the land plots in the possession of the regional public stock in the territory of the collection of citizens of "Yangi Hayot" mahalla of Akhangaran district of Tashkent region

On the basis of paragraph 4 of Annex 2 of the Resolution of the President of the Republic of Uzbekistan №3874 as of July 19, 2018 "On additional measures to accelerate the implementation of investment and infrastructure projects in 2018-2019", having considered the submitted documents on the land management related to the allocation of land plot for the organization of production electricity from gas obtained received from solid waste for SUE "Maxsustrans" of khokimiyat of Tashkent city out of the land plots in the possession of the regional public stock in the territory of the collection of citizens of

"Yangi Hayot" mahalla of Akhangaran district, on the basis of Article 6 of the Law of the Republic of Uzbekistan "On Local State Administration"

I AM DECIDING:

1. To approve the Act of the commission on allocating land for non-agricultural needs in the district khokimiyat as of August 16, 2018 about allocating a land plot in the area of 30,0 hectares, including 26,8 hectares of irrigated land, 1,1 hectares of meadows and pastures, 1,9 hectares irrigation ditches and drainage ditches and 0,2 hectares of roads for the organization of electricity production from gas obtained from solid waste for the Production Directorate of "Maxsustrans" of khokimiyat of Tashkent city out of the land plots in the possession of the regional public stock in the territory of the collection of citizens of "Yangi Hayot" mahalla of Akhangaran district.

2. To allocate a land plot in the area of 30,0 hectares, including 26,8 hectares of irrigated land, 1,1 hectares of meadows and pastures, 1,9 hectares irrigation ditches and drainage ditches and 0,2 hectares of roads located on the contours of 337k, 338, 340, 342, 343, 344 and 345 of the agricultural map for the organization of electricity production from gas obtained from solid waste for the Production Directorate of "Maxsustrans" of khokimiyat of Tashkent city out of the land plots in the possession of the regional public stock in the territory of the collection of citizens of "Yangi Hayot" mahalla of Akhangaran district.

3. Production Directorate of "Maxsustrans" of khokimiyat of Tashkent city shall:

A) Note, that to design the construction project for the organization of electricity production from gas obtained from solid waste, first of all, it is necessary to order for assignments (ART-1-2 parts) for architectural planning in the Main Department of Architecture and Civil Engineering of Tashkent region,

B) Approve, that the loss of agricultural production (cash indemnification for losses) from the land plot allocated for permanent use for the organization of electricity production from gas obtained from solid waste for the Production Directorate of "Maxsustrans" of khokimiyat of Tashkent city out of the land plots in the possession of the regional public stock in the territory of the collection of citizens of "Yangi Hayot" mahalla of Akhangaran district will be paid for by the Production Directorate of "Maxsustrans".

C) Remind the Production Directorate of "Maxsustrans" of khokimiyat of Tashkent city that, with the condition of transferring used land plots at the disposal of the district public stocks where the electricity manufacturing has been organized from gas from solid waste, with preliminary remediation, and keeping in working condition functioning irrigation and melioration networks, engineering communications in gradually additionally allocated land plots and border areas in the construction period used by farms and agricultural enterprises.

4. On the basis of this decision the head of the district department of Land Resources and the State Cadastre (B. Sotiboldiyev) is assigned to introduce appropriate changes in the district land fund.

5. To make official warning to the Production Directorate of "Maxsustrans" that on the basis of Article 10 of the Law of the Republic of Uzbekistan "On Local State Administration", if the allocated land plot is not developed within three years, this decision loses its validity.

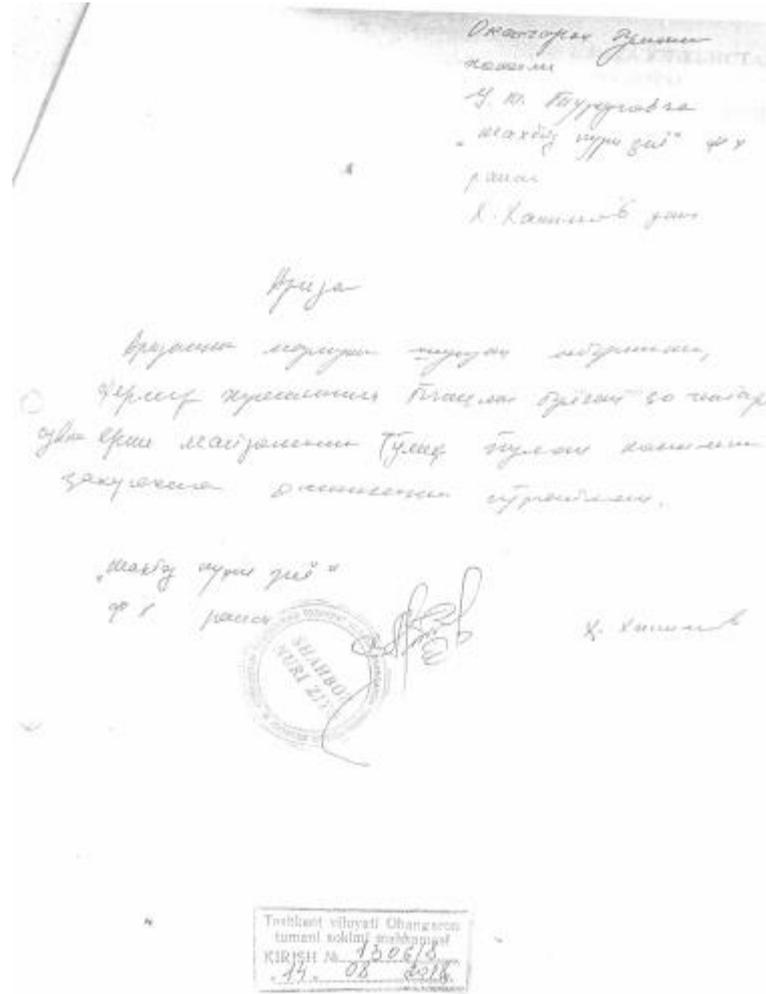

6. To introduce the discussion of this decision into the agenda of the regular session of the Council of People's Deputies of Akhangaran district.

7. To ask khokim of Tashkent region to approve this decision.

8. Control over the execution of this decision shall be assigned to the first deputy of khokim of district M. Miryunusov.

Khokim of the district

U. Tursunov

Translation in English is unofficial

Decision

On returning to the district state reserve a part of land belonging to Shakhboz Nuri Ziyo farming enterprise working in mahalla Yangi Hayot

According to Article 36 (part 4) of the Land Code of the Republic of Uzbekistan, Paragraph 1 and having considered the petition of the head of Shakhboz Nuri Ziyo farming enterprise H. Khakimov to the district khokim,

I decide:

- 1. To satisfy the petition addressed to the khokim of the district on returning to the district state reserve a total of 83.61 hectares of land belonging to Shakhboz Nuri Ziyo farming enterprise working in mahalla

Yangi Hayot, including: 45.06 hectares of irrigated land, 0.8 hectares of lakes, 24.4 hectares of gardens, 3.9 hectares of pastures and pastures, 0.5 hectares of forests, 6.52 hectares of ariks and dumps, 1.37 ha of roads and part of 1.06 hectares of land, ie 30.0 hectares, of which 26.8 are irrigated, 1.1 pastures, 1.9 water and 0.2 ha of roads.

2. To return part of the land plot owned by Shakhboz Nuri Ziyo farming enterprise, namely 337k, 338, 340, 341, 342, 343, 344 and 345 contours which are 30.0 hectares of land out of which 26.8 irrigated, 1.1 pastures, 1.9 water reaches and 0.2 hectares of roads to the district state reserve.

3.
